FIVICS ARCHERY

KROSSEN ARCHERY

KROSSEN ARCHERY

"Everyone can enjoy Archery"

Since Fivics archery center has launched on April, 2015, Fivics has been focusing on how to enjoy archery from not only top shooters but also normal peoples and now, we hereby introduce Fivics's new line up for 2016. Believe our dreams come true.
This is Krossen line and we can say "Now, everybody can enjoy archery by using of this top quality and beautiful designed gears"
There were only small options for beginners or middle class before, but we Fivics think we have to increase more options for all of peoples who love Archery as we love.

"Beyond the Archery"

FIVICS® ARCHERY

"The best way to increase your career / Top shooter's choice"

Fivics lines are loved by all shooters because of its own unique design and perfect function of shooting. Fivics line up is cleared more and now, we hereby introduce Fivics's new line up for top shooters and persons who want to be a top shooter.
"Confidence" "Concentration" "Overcome" "Belief" "Victory"
The above small words make your dreams come true and you will get them from Fivics. Are you ready? Please look into what they are.

"Over the Archery"

PERFECT CENTROIDAL BALANCE

TITAN X2™

HT0525 » TITAN X2 RISER

- Superfine CNC milling
- Special unique designed wooden grip
- Slow production
- Perfect centroidal balance

- Flawless coating

SAKER+ PLUS

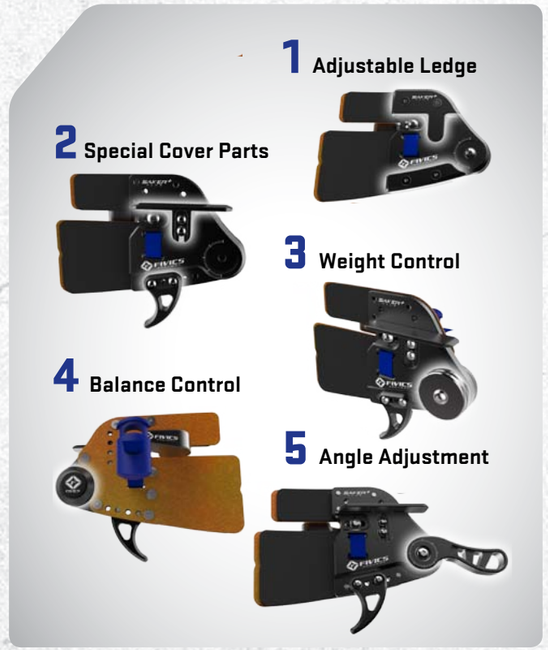

SFT04A » Saker+ Plus finger tab.

Saker+ Plus finger tab has 6mm of thickness and added 3 weight control and 5 angle adjustment system by using of precisely machining aluminum plate.
Saker+ Plus finger tab can be adjusted depending on individual characteristics and allows more stable hooking position and it makes possible to shoot perfectly in any competition.
And also, it is very easy to cover the special parts for the thumb and little finger.
We have considered only shooter's convenience and individual characteristics always.

Saker+ Plus finger tab's spacer is designed for the bending of the shaping as well it looks like the elephant-shape and makes comfortable for shooters.

Fivics is using high quality cordovan leathers only which is provided by H company with one hundred years history in U.S.A

NANO-XQ™

ARNX001 » NANO XQ ARROW (Recurve & Compound)
Excellent in grouping of arrows with stability and accuracy

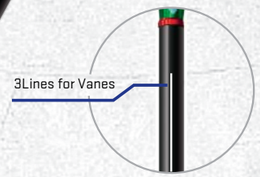

Nano XQ, it took more than 3 years testing and developing by Korean national team member, Mr. Jang Young Ho and during testing, we Fivics found the perfect inner diameter to make stability and accuracy between point and shaft, ¢ 3.15

Uniform production makes equal specification and has outstanding arrow grouping and reducing arrow damage rate which is always troublesome of carbon arrow's natural.

Fivics also found new material for Nano XQ arrow and it is MC 46ton carbon which has strong points in accuracy and durability of epoxy resin.

We, Fivics, hereby can tell you that Nano XQ is perfect for Archery competition arrow due to these outstanding reasons.

THOR

ARTH001 » THOR ARROW
Speed and accuracy

There are 5types of spins for Thor arrow and it would be optimized for 3D and hunting arrow.

Thor is the lightest arrow in the FIVICS's 3D & hunting line and provides excellent speed with pinpoint accuracy. Thor is made with Diamond Weaving which FIVICS has exclusive, innovative carbon cross-weaving material design that drives better spine uniformity, resulting in better accuracy. Thor is the ultimate arrow for archers who want top speed and accuracy.

TEN Pro

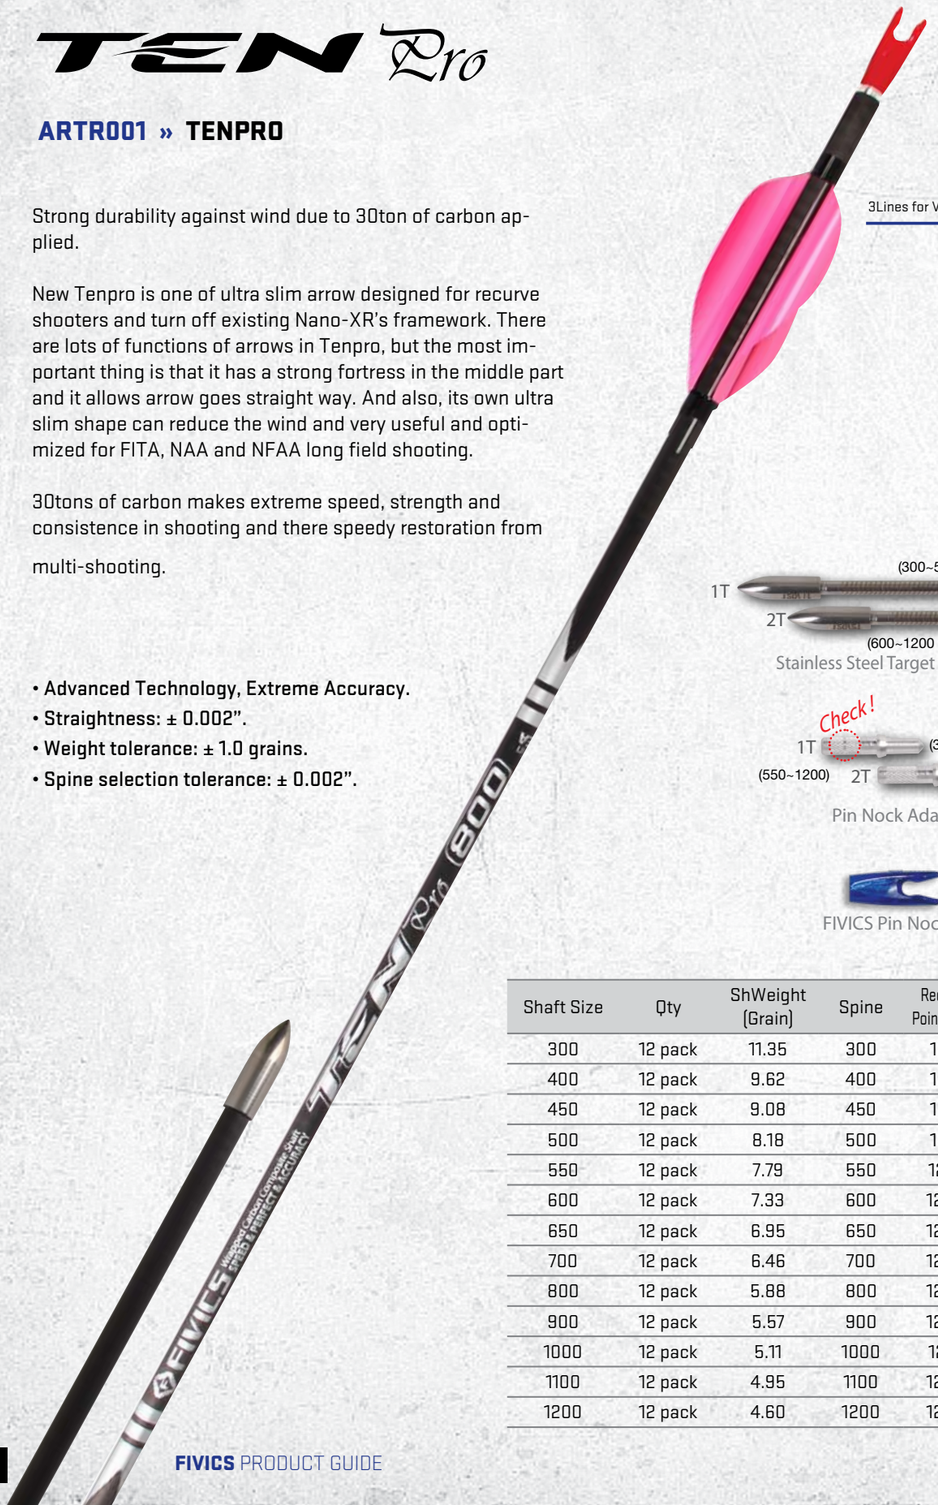

ARTR001 » TENPRO

Strong durability against wind due to 30ton of carbon applied.

New Tenpro is one of ultra slim arrow designed for recurve shooters and turn off existing Nano-XR's framework. There are lots of functions of arrows in Tenpro, but the most important thing is that it has a strong fortress in the middle part and it allows arrow goes straight way. And also, its own ultra slim shape can reduce the wind and very useful and optimized for FITA, NAA and NFAA long field shooting.

30tons of carbon makes extreme speed, strength and consistence in shooting and there speedy restoration from multi-shooting.

• Advanced Technology, Extreme Accuracy.
• Straightness: ± 0.002".
• Weight tolerance: ± 1.0 grains.
• Spine selection tolerance: ± 0.002".
